

All children are different..... but they are ALL *pre-wired* to learn from birth!!
If your child is struggling in school, there's a reason.

For many children, “*wiring*” is an issue and if this is the case.....**more of the same, isn't enough!** Children who have deficits in attention, auditory processing, sensory integration, or visual processing will not acquire basic academic skills at the expected pace and will oftentimes be seen as lazy, disruptive, or less intelligent than their peers. Repeated practice of academic skill deficits (more of the same) and/or providing only encouragement and incentives will likely lead to frustration because the actual “*wiring glitch*” is not addressed and skills continue to be too difficult.

FAST TRACK for Overall School Success

Confidence

Improved Study Skills and Work Habits

Accelerated Academic Progress (AAP)

Put those missing skills in place by addressing “*rewiring*” so your child will be a successful learner for years to come!

AAP Fast Track K to 1

AAP Fast Track 1 to 2

All children begin the ***Fast Track*** Program by receiving a thorough evaluation to identify strengths and areas of challenge as part of the **READ** Center's Team Evaluation process. ***Fast Track*** programming may include a combination of educational and therapy options depending on the identified needs of the child. A team of professionals will provide an individualized and coordinated program designed to address wiring glitches while building reading, writing, and math skills.
